01 / THE DIRECTION

A quiet space.
An obvious next step.

Decisions agreed. Screens still to agree.

01

Auth has the atmosphere.

Keep your welcome. Animation ends at authentication.

02

Anime or Manga. Remember it.

One persistent choice, including what the backend fetches.

03

Home is personal. Discover is new.

Continue, relevant releases, club context. Search lives in Discover.

04

Your collection, as a shelf.

Easy progress. Clear statuses. Optional personal shelves.

05

People through clubs.

Identity first. Activity only when enabled. No separate friend graph.

KEEP Top navigation + swiping / Short copy / Free core

Still to agree: screen layouts, Home order, exact navigation, music scope.

02 / WHAT TO FIX FIRST

Make it reliable.
Then make it feel special.

Source audit + read-only live evidence. No changes deployed.

1

Small edit, too many reloads.

A progress change can reload both libraries and several collection views.

2

Background work is expensive.

Live similarity job: 287 runs / 24h; 26s average. Not screen latency.

3

Upcoming needs better data.

Sparse anime dates. No manga schedule. Unknown must stay unknown.

4

Use what we already have.

Cover colors, relations and credits exist. Improve freshness and use.

5

Music starts with the right scope.

OP/ED credits + official links proposed. Playback remains undecided.

ORDER Agree screens → fix foundations → build → measure

Revenue: useful optional book links / disclosed partner benefits. No tracker paywall.
